VELVET

The Velvet spa, with room for five, has been manufactured for domestic and residential use. It gives the most complete massage circuit on the market and is particularly suitable for tall people, who can enjoy a relaxing or therapeutic hot tub without the discomfort they may find in other hot tubs that are too shallow or narrow.

Whatever the hot tub user's body type or height, the 52 hydromassage jets and 16 air nozzles in the Velvet hot tub give an adjustable power massage that reaches all the muscles in the body.
